Track and trace is critical to ensure the integrity of products as they move through the value chain.

Merit for Life Science enables you to recall trace (both forward and backward) any product at any time, quickly and completely — from the finished good to each raw material used — and every step in between.

Merit for Life Science helps you better manage inventory shelf life, an ongoing challenge for pharmaceutical manufacturers. With extended PowerBI, you can reactively manage inventory control assets tied up in the warehouse, intermediate product, and finished goods stock inventory with associated costs per lot. Shows lots are used before they expire or before the volume of lots required to get them out of the warehouse class, and tracks and performs the necessary action.

The Executive Dash Report process simplifies and automates the creation of Executive Dashboards. The inclusion of details is a single report. The report can be used to identify the need for action to the business. Reports are regularly generated to summarize the summary.

Item	Quantity	Unit	Value	Category
Item 1	1000	kg	10000	Raw Material
Item 2	500	kg	5000	Raw Material
Item 3	200	kg	2000	Raw Material
Item 4	100	kg	1000	Raw Material
Item 5	50	kg	500	Raw Material
Item 6	25	kg	250	Raw Material
Item 7	12.5	kg	125	Raw Material
Item 8	6.25	kg	62.5	Raw Material
Item 9	3.125	kg	31.25	Raw Material
Item 10	1.5625	kg	15.625	Raw Material

Merit for Life Science extends standard master planning functions to create a full production of a low-level material Quality Order. This provides key information for sales responsible for planning or tracking quality testing processes and for anticipating potential supply chain bottlenecks caused by backlogs.

Pharma and biotech manufacturers rely heavily on suppliers for the provision of materials and services. With Merit for Life Science, you can configure and maintain the classification level of both products and vendors.

Track and qualify vendors for items before ordering raw materials from them, track all interactions including nonconformances, proactively manage those approaching recertification, and automatically unapproved vendors if changes in classification level are made.

Vendor ID	Vendor name	Item classification	Expiration	Work flow status	Item classification
1001	ABCDEF	1/16/2020	12/31/2020	Ready for review	10-RAD
1002	ABCDEF	4/30/2020	11/30/2021	Item reviewed	10-RAD
1003	ABCDEF	4/30/2020	4/16/2021	Approved	10-RAD
